## CONTENTS OF VOLUME 3

NUMBER 1, JANUARY 1962

|                                                                                                                                                                                   |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Z. Z. ZIPORIN, E. BEIER, D. C. HOLLAND, AND E. L. BIERMAN. A Method for Determining the Metabolites of Thiamine in Urine                                                          | 1  |
| DON SCOTT AND FRANK E. HAMMER. Glucose in "Chemically Pure" (C. P.) Galactose: Its Determination and Elimination; Action of Glucose Oxidase on Galactose . . . . .                | 13 |
| PAUL F. KRUSE, JR., JAMES H. NASH, AND HENRY A. CARTER. On the Purity and Purification of C <sup>14</sup> -Labeled Arginine . . . . .                                             | 17 |
| SAMUEL RAYMOND AND MASUMI NAKAMICHI. Electrophoresis in Synthetic Gels. I. Relation of Gel Structure to Resolution . . . . .                                                      | 23 |
| HERMAN BAKER, O. FRANK, V. B. MATOVITCH, I. PASHER, S. AARONSON, S. H. HUTNER, AND HARRY SOBOTKA. A New Assay Method for Biotin in Blood, Serum, Urine, and Tissues . . . . .     | 31 |
| GEORGE L. ELLMAN. The Biuret Reaction: Changes in the Ultra-violet Absorption Spectra and Its Application to the Determination of Peptide Bonds . . . . .                         | 40 |
| SIDNEY UDENFRIEND AND PEROLA ZALTZMAN. Fluorescence Characteristics of Purines, Pyrimidines, and Their Derivatives: Measurement of Guanine in Nucleic Acid Hydrolyzates . . . . . | 49 |
| O. PELLETIER AND J. A. CAMPBELL. A Rapid Method for the Determination of N'-Methylnicotinamide in Urine . . . . .                                                                 | 60 |
| ERIC SCHRAM AND ROBERT LOMBAERT. Determination of Tritium and Carbon-14 in Aqueous Solution with Anthracene Powder                                                                | 68 |
| LEO M. HALL. Preparation of Crystalline Lithium Acetoacetate . . . . .                                                                                                            | 75 |

## SHORT COMMUNICATIONS

|                                                                                                                                              |    |
|----------------------------------------------------------------------------------------------------------------------------------------------|----|
| BRIAN T. RUDD. A New Method for the Detection of Phospholipids in the Electrophoretically Separated Serum Lipoprotein Fractions . . . . .    | 81 |
| BEN BLOOM. The Simultaneous Determination of C <sup>14</sup> and H <sup>3</sup> in the Terminal Groups of Glucose . . . . .                  | 85 |
| ROBERT L. CLEMENTS. A Simple and Efficient Trap for Freeze-Drying and Similar Applications . . . . .                                         | 87 |
| ETHEL COSMOS. Autoradiography of CA <sup>45</sup> in Ashed Sections of Frog Skeletal Muscle . . . . .                                        | 90 |
| JOHN H. MCCLENDON. A Simple Colorimeter Using the 254 m $\mu$ Line of Mercury for Continuous Monitoring of Chromatographic Effects . . . . . | 94 |

## NUMBER 2, FEBRUARY 1962

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| HERBERT H. WOTIZ AND HORACE F. MARTIN. Studies in Steroid Metabolism. XI. Gas Chromatographic Determination of Estrogens in Human Pregnancy Urine . . . . .            | 97  |
| STELLAN HJERTÉN AND ROLF MOSBACH. "Molecular-Sieve" Chromatography of Proteins on Columns of Cross-Linked Polyacrylamide . . . . .                                     | 109 |
| B. G. CREECH AND BETTIE W. SEWELL. A Rapid Micro Procedure for Determination of Free and Esterified Cholesterol in Blood Serum Using Silicic Acid Separation . . . . . | 119 |
| LAWRENCE M. LEWIN. A Bioautographic Method for the Identification of Inositol and Inositol Phosphate . . . . .                                                         | 124 |
| D. WATSON. Enzymic Determination of Glucose and Easily Hydrolyzable Glucose Esters in Blood . . . . .                                                                  | 131 |
| ALAN F. HOFMANN. Thin-Layer Adsorption Chromatography on Microscope Slides . . . . .                                                                                   | 145 |
| SYLVAN M. SAX, PHILIP J. MIGLIORE, AND RAY H. BAUGHMAN. Preparation, Analysis, and X-Ray Diffraction Identification of Barbiturate Silver Salts . . . . .              | 150 |
| ROBERT P. SANDMAN. The Determination of Gamma-Aminobutyric Acid in Brain . . . . .                                                                                     | 158 |

### SHORT COMMUNICATIONS

|                                                                                                 |     |
|-------------------------------------------------------------------------------------------------|-----|
| E. TYSZKIEWICZ. An Improved Solvent System for the Paper Chromatography of Phosphate . . . . .  | 164 |
| ARTHUR W. DEVOR AND DAVID H. CANOWITZ. Formaldehyde Extraction of Glycogen from Liver . . . . . | 166 |
| R. C. BARRETO AND D. B. MANO. Washing of Protein Solutions . . . . .                            | 169 |

## NUMBER 3, MARCH 1962

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| F. ROTHMAN AND A. HIGA. A New Two-Dimensional System for the Separation of Amino Acids on Paper . . . . .                                                   | 173 |
| R. W. BAILEY. A Method for the Measurement of Lipid-Bound Sugar in Plant Tissue . . . . .                                                                   | 178 |
| HIROSHI ISHIHARA. Determination of Pyrimidine Ribonucleosides and Nucleotides with the Orcinol Reaction . . . . .                                           | 186 |
| HERBERT W. DICKERMAN AND MARY LOUISE CARTER. A Spectrophotometric Method for the Determination of Lysine-Utilizing Bacterial Lysine Decarboxylase . . . . . | 195 |
| J. S. BARLOW. Electrophoresis of Insect Hemolymph on Starch Gel: Effects of pH and Buffer . . . . .                                                         | 206 |

|                                                                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| BOGUSLAW SAMOTUS AND SIGMUND SCHWIMMER. Behavior of Phytate in Barium Fractionation of Acid-Soluble Phosphoric Esters of Potato Tubers . . . . .                              | 212 |
| ALBERTA BLAIR AND STANTON SEGAL. Use of Filter Paper Mounting for Determination of the Specific Activity of Gluconate-C <sup>14</sup> by Liquid Scintillation Assay . . . . . | 221 |
| EDWARD S. ROREM AND J. C. LEWIS. A Test Paper for the Detection of Galactose and Certain Galactose-Containing Sugars . . . . .                                                | 230 |
| G. LEW CHOULES. A Linear-Gradient Mixing Device for Viscous Solutions . . . . .                                                                                               | 236 |
| R. W. VON KORFF. A Method for Determination of Changes in Radioactive Adenine Nucleotide Composition in Complex Enzymic Systems . . . . .                                     | 244 |
| JAMES LESLIE, DAVID L. WILLIAMS, AND GEORGE GORIN. Determination of Mercapto Groups in Proteins with <i>N</i> -Ethylmaleimide . . . . .                                       | 257 |

#### SHORT COMMUNICATION

|                                                                                            |     |
|--------------------------------------------------------------------------------------------|-----|
| A. M. STEWART, D. J. PERKINS, AND J. R. GREENING. A Rapid Rock and Roll Dialyzer . . . . . | 264 |
|--------------------------------------------------------------------------------------------|-----|

#### NUMBER 4, APRIL 1962

|                                                                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| WACLAW SZYBALSKI AND HORST-DIETER MENNIGMANN. The Recording Thermospectrophotometer, an Automatic Device for Determining the Thermal Stability of Nucleic Acids . . . . . | 267 |
| M. A. NAUGHTON AND HELEN HAGOPIAN. Some Applications of Two-Dimensional Ionophoresis . . . . .                                                                            | 276 |
| SAMUEL A. MORELL, VALBORG E. AYERS, AND TIBOR J. GREENWALT. Linear Gradient Elution of Nucleotides from Dowex-1-Formate: Application to the Erythrocyte . . . . .         | 285 |
| JOHN F. WALPER, FAYNE L. TUCKER, AND MILO DON APPLEMAN. Use of Thioacetamide for the Quantitative Determination of Tellurite in Bacteriological Media . . . . .           | 298 |
| R. L. SMITH AND R. PAOLETTI. A Procedure for the Assay of Nor-epinephrine in Adipose Tissue . . . . .                                                                     | 302 |
| RAYMOND SHAPIRA. A Spectrophotometric Method for the Measurement of Ribonuclease Activity . . . . .                                                                       | 308 |
| V. MOSES, A. K. HUGGINS, AND M. J. H. SMITH. Experimental and Tissue Variation in Tracer Studies of Intermediary Metabolism of Isolated Rat Liver . . . . .               | 321 |
| GORDON GUROFF AND MICHAEL A. CHIRIGOS. Fluorescence of the Fluorinated Phenylalanines . . . . .                                                                           | 330 |
| HENRY M. FALES AND JOHN J. PISANO. Gas Chromatography of Biologically Important Amines . . . . .                                                                          | 337 |

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| MELVIN BLECHER AND ARMAND B. GLASSMAN. Determination of Glucose in the Presence of Sucrose Using Glucose Oxidase: Effect of pH on Absorption Spectrum of Oxidized <i>o</i> -Dianisidine . . . . . | 343 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|

#### SHORT COMMUNICATIONS

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| W. J. DUNLAP, Y. NAKAGAWA, AND S. H. WENDER. Preparation of Highly Purified Flavonoid Aglycones for Biological Studies . . . . .           | 353 |
| PRISCILLA P. SAUNDERS AND L. W. PARKS. Some Observations on the Fluorescence Analysis of Anthranilic Acid . . . . .                        | 354 |
| R. H. DECKER, NORMA YESS, AND R. R. BROWN. Preparation of <i>N</i> <sup>1</sup> -Methylnicotinamide Chloride by Dowex-2 Chloride . . . . . | 357 |
| WARWICK SAKAMI. Anaerobic Gradient Elution Chromatography . . . . .                                                                        | 358 |

#### NUMBER 5, MAY 1962

|                                                                                                                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| CHIZUKO KAWANO, HIROHIKO KATSUKI, TSUYA YOSHIDA, AND SHOZO TANAKA. A Method for Extraction and Determination of 2,4-Dinitrophenylhydrazones of Keto Acids . . . . .                                                                     | 361 |
| RONALD W. ESTABROOK AND P. K. MAITRA. A Fluorimetric Method for the Quantitative Microanalysis of Adenine and Pyridine Nucleotides . . . . .                                                                                            | 369 |
| R. L. AIRTH AND G. ELIZABETH FOERSTER. Simultaneous Determination of Thiamine and Pyrithiamine . . . . .                                                                                                                                | 383 |
